

# Nginx Tunning

## Nginx GeoIP

<https://mailfud.org/geoip-legacy/>

Install Nginx Module

```
apt install nginx-module-geoip
```

The GeoIP dynamic modules for nginx have been installed.

To enable these modules, add the following to `/etc/nginx/nginx.conf` and reload nginx:

```
load_module modules/ngx_http_geoip_module.so;
load_module modules/ngx_stream_geoip_module.so;
```

```
http {
    geoip_country /usr/share/GeoIP/GeoIP.dat;
    geoip_city /usr/share/GeoIP/GeoIPCity.dat;
}
```

```
VHOST{
    add_header X-GeoIP "$geoip_country_code";
}
```

## NGINX Tuning For Best Performance
