

# Register New Gitlab Runner (Docker-in-Docker)

## Register New Runner

```
docker run --rm -it -v /opt/GitlabRunner/config:/etc/gitlab-runner gitlab/gitlab-runner
register --url https://gitlab.com --token TOKEN
```

## compose.yml

```
services:
  gitlab-runner-container:
    image: gitlab/gitlab-runner:latest
    container_name: gitlab-runner-container
    restart: always
    volumes:
      - ./config:/etc/gitlab-runner/
      - /var/run/docker.sock:/var/run/docker.sock
```
